

## BASILIO

**EARLY MEGA  
PRODUCTION!**

### ADVANTAGES

- Autumn wheat variety with good production potential and stable yield.
- Excellent milling characteristics with very good baking indexes.
- High ecological plasticity.
- Yield potential: 8-10 t/ha

### AGRONOMIC CHARACTERISTICS

- Medium to small sized aristat,
- Very resistant to winter
- Maturity group: early;
- Excellent twinning ability.
- Optimum sowing period: 25.09 - 25.10;
- Sowing norm: low
- 380 - 400 bg/sqm;
- MMB: medium.

### DISEASE RESISTANCE

**Highly resistant to:**

- Fusarium (*Fusarium spp.*)
- Rust (*Puccinia spp.*)

**Good resistance to:**

- Powdery mildew (*Blumeria graminis*)

### QUALITATIVE INDICATORS

- Protein: 12.5 - 13.5 % ;
- Gluten: 28 - 30%;
- Grain hardness: good;
- MH: 78 - 81 kg/hl
- Hagberg index: 380 - 390;
- Zeleny index: 40 - 50 ml
- W (at 11% protein): 220
- P/L (at 11% protein): 0.45 - 0.50
